

IOF

INTERNET OFFER FORMAT

for online shops
v 2.5

Our shop is based on the IAI-Shop platform. One of the most important functions of this system is the possibility of generating our product offering in two different file formats – XML and CSV.

Those files contain all the information on our products, such as their description, links to images, stock information, as well as parameters allowing the adequate description and collation of our products in the system.

XML

Upon registering, you shall receive the gateway.xml main file that contains all the links to lists and files comprising the generated offering.

```

SIZE STANDARDS –
EXAMPLES:

36 – W
37 – X
38 – Y
39 – Z
40 – 18
41 – 19

CSV

We rarely work with CSV. Our customers usually prefer the wider variety of options XML offers, but for customers with systems that are not XML-compatible, we also offer the CSV format.

The CSV file is divided into two sub-files:

- **FULL - with full information**
- **LIGHT - with stock availability information**

ATTENTION:

Generated files are comma-separated and UTF8-encoded.
